**Date of Birth:** 12/16/2002

**Gender:** Male

**Marital Status:** Single

Nationality: Egypt

---

As a dedicated and skilled frontend developer, I bring a wealth of experience and expertise to the table. With a solid educational background as a third-level student at the Faculty of Computers and Artificial Intelligence (FCAI) at Cairo University, I have honed my skills in crafting exceptional user interfaces and delivering seamless user experiences.

Key highlights of my journey as a frontend developer include:

Proficiency in HTML, CSS, and JavaScript, enabling me to translate design concepts into elegant and functional web interfaces.
Extensive experience with frontend frameworks such as React, Angular, and Vue.js, allowing me to build dynamic and interactive web applications efficiently.
Strong understanding of responsive design principles, ensuring optimal performance across various devices and screen sizes.
A keen eye for design aesthetics and user experience, driving me to create visually appealing and intuitive interfaces that engage users.
Dedication to staying updated with the latest trends and best practices in frontend development, ensuring that my skills are always aligned with industry standards.
Proven ability to collaborate effectively with cross-functional teams, contributing to the success of projects through effective communication and teamwork.

With a passion for innovation and a commitment to excellence, I am eager to leverage my skills and experience to create impactful frontend solutions that delight users and drive business growth.

## 🎓 Education

**September 2021 - Till Date**

### Computer Scince - Cairo University

Bachelor Of Engineering

Cairo.

## 📋 Projects

- Freshcart-Ecommerce:
  Demo: Products (mahmouds10.github.io)
  Description: A complete e-commerce website with authentication and authorization control. It allows customers to create an account and login. If user authenticates with the db he can place an order and choose the payment method and view orders history. Very well designed and work on all devices.

- Todo-List:

  Demo: To-Do List (mahmouds10.github.io)

  Description: A todo list website that allows user to create, update or delete a todo. It allows the user to filter the list too. Very well designed and works on all devices

- Weather-Website:

  Demo: Products (mahmouds10.github.io)

  Description: A website to view weather across three days: yesterday, today, and tomorrow. When the website is opened, it detects the location and brings the real weather state. You can also search for a specific city to view its weather, and a button to reset to your location. Not responsive; only for PCs and laptops, not for mobile devices.

- Games-Reviews:

  Demo: Games Reviews (mahmouds10.github.io)

  Description: Explore our gaming hub featuring all games and categories. Click on a game to access detailed information and an official website link. Designed to be responsive on all devices for effortless browsing.

- Signup and Login:

  Demo: Read Begin (mahmouds10.github.io)

  Description: A website that allows you to signup and login to the created account using the local storage to store user information, Very well designed and user-friendly interface that works well on all devices and excellent user experience.
